

A SAD, SAD DAY
2009.06.01

After operating on its own for over 100 years, General Motors has become Government Motors.

This is a huge mistake on the part of our policy makers, who are taking us down the road to socialism.

If you think General Motors' management was bad, wait until you see how the politicians do.

Those who have failed us with their stupid policies are still in place: Washington and the labor unions.

How perverse can you get?!
